RELIABLE GLADIOLUS

Since I am single, 30 and not connected with an industry vital to national defense, I shall probably be with the armed forces before spring is over. I have been unable to find anyone to handle this business so will sell the stock, hoping to be back with you when peace is again with us all.

The best varieties are listed here at retail prices, the rest will be invoiced and listed by lot, that is, so many each of large, medium and small bulbs and bulblets of a variety at a price well below real value. If you are interested in these prices write and ask that "Special lists be sent you when out." They probably will be sent only to those interested enough to request them.

If you are interested in any kind listed last year, please order from 1941 list AT ONCE. (Newer kinds at current prices.) Many kinds are not available elsewhere and may never be offered again. 1941 list sent on request. These varieties will be disposed of as soon as possible, so ORDER NOW.

Try to get ALL orders to me by APRIL 15 as I must have them all cleaned up by May 1. This concerns everything listed. Bulbs are of the same fine quality that have brought me so many repeat orders and much fine comment, carefully hand selected, free of disease and treated for thrips. Every effort will be made to have them labelled true to name, and the usual generous count will be sent. If

you are not more than pleased with bulbs on arrival, return them and your money will be refunded.

These prices are POSTPAID. Bulbs will be mailed as fast as orders can be filled in the west, and held for eastern customers until the latter part of March, or when requested. Early mail shipments to the east at buyers' risk.

Be sure to give your name and address and tell me how many of what size and variety you want, enclose check, money order, currency (Or stamps on small orders only). Bulbs can be sent c.o.d. if you wish, but c.o.d. orders to be held for later delivery must be accompanied by 25% deposit.

Five bulbs sold for $\frac{1}{2}$ the price of 10, 25 or 50 at 100 rates. Graded dozens (One variety, assorted sizes), 6 times the price of one large bulb. You may have single bulbs at 1/10 the price of 10, BUT NOT LESS THAN 10c WORTH OF A VARIETY SOLD.

Thank you for your past patronage and for the nice letters received. They were greatly appreciated.

MIXED BULBS Fifty for \$1.00 prepaid in U. S. You can't beat these anywhere at near the price.

CLOSEOUT DISCOUNTS

Having more bulbs than I know what to do with I am making the following discounts IN BULBS for CASH ORDERS. Select extra bulbs to the extent of 15% on orders of from \$2.00 to

UNITED STATES POSTAGE

\$5.00; 20% on orders of from \$5.00 to \$25.00, and 25% on orders of over \$25.00 from this list. In addition I will send from 10% to 25% overcount and usually some extra variety, while stock lasts. It will pay you to stock up this year. Prices will be much higher hereafter.

MY 1942 INTRODUCTION

"DREAM PINK" Clear light pink with small white throat, the most perfect pink I have seen. Florets are firm and well attached of a luscious color and open well when cut, even in tight bud. Six to nine open at one time and average between 5 and 6 inches across. Grew 57 inches tall—one of the tallest in my patch. Quite vigorous but not as prolific as Picardy. It blooms late midseason.

Have had reports on this from several sections of the country and all have been very favorable. It is one of the few glads that attain good size without losing their refinement.

It blooms second early and although rather short, is the most popular cut flower in my field, local florists say a dozen will make a better spray than 2 dozen of most other varieties. I understand it is gaining in popularity as a cut flower wherever grown. For exhibition it is beginning to get its quota of

prizes. Won Grand Champion sweepstakes at Oregon State fair, which has a sizeable glad show, 1941. Has a vote of commendation from the West Virginia Glad society, 1941, Certificate of Merit, San Francisco World's fair, 1940. Also an Award of Merit from the British Gladiolus Society, 1939. PICARDY (Brandon Strain) 52-6-7. Well known pink with buff undertone and soft rose throat. This stock has been propagated from one plant that was superior to its fellows and has remained superior consistently, have had 2 reports of poor luck with this, and perhaps a hundred telling me how good it is.
